# MeetForSport - Pitch

Dresden, 28.01.2022

# Do you know this feeling?

# App Idea

This app will allow users to join group activities (i.e. football) or join ongoing events. Targeting mostly active persons, this small social network will allow users to find new friends/persons with the same interests and therefore allow these people to become more active.

# Need

# Problem

Often our social circle is not big enough or not flexible enough to organize big or spontaneous sport events.

# Problem

Other social networks like facebook or whatsapp often do not have functions tailored to this specific problem, but only offer large public groups or similar.

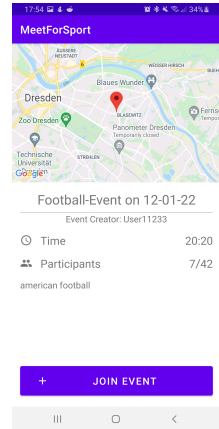

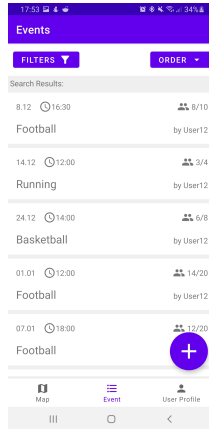

# Approach

# Approach

A social network that is specialized for precisely these problems. It is specialized for sports, adjusts to your needs/time constraints

# Approach

# Architecture

- Client Side: Android with Java
- Server Side: JavaScript Express.js, Node.js
- Database: JSON (only for the prototype)

# Benefits

# Benefits

- Easy social networking for a specific situation
- adaptability to your time constraints
- extend your social circle via our new social network
- opportunities to get more active

# Team

# Team

- Felix Fischer - Backend
- Mattis Lahr - Frontend

# Thanks for your attention - any questions?
